### METEOROLOGICAL RESULTS.

FROM THE MARINE CORRECTORIAL SERVICE.

[illegible]

The Standard Barometer and Thermometers are read at 8 A.M., 10 A.M., 4 P.M., and 8 P.M., and the daily mean is obtained by the application of hourly percentages, deduced from twenty years' observations. The station of the Barometer is twenty-two feet above the level of the sea, and the reading reduces to the datum. The station of the thermometer is two feet from the ground. The wind, tide and general weather registered are of the Irish Gauge Bore—Irish midnight is midnight.

For the current Civil Day—from midnight to midnight, the average due for the month of January last is as follows:

The total quantity of rice collected since January 1st is 41,400 cwt., the average due for the same period being 33,300 cwt.
